## Example Food Employee Illness Reporting Policy

The purpose of the Food Employee Illness Reporting Policy is to ensure that all food employees report to the “person in charge” (PIC) information about their health as it relates to diseases that are transmissible through food.

### Reporting

A food employee shall report the information in a manner that allows the PIC to reduce the risk of foodborne disease through transmission if the food employee or conditional employee:

1. Has any of the following symptoms:
  - a. Vomiting
  - b. Diarrhea
  - c. Jaundice
  - d. Sore throat with fever
  - e. Lesions (containing pus or an infected wound that is open or draining)
  
2. Has an illness diagnosed by a health care provider due to:

<ol style="list-style-type: none"><li>a. Campylobacter</li><li>b. Cryptosporidium</li><li>c. Cyclospora</li><li>d. Entamoeba histolytica</li><li>e. <b>Escherichia coli *</b></li><li>f. Giardia</li><li>g. <b>Hepatitis A *</b></li></ol>	<ol style="list-style-type: none"><li>h. <b>Norovirus *</b></li><li>i. Salmonella ssp.</li><li>j. <b>Salmonella Typhi *</b></li><li>k. <b>Shigella *</b></li><li>l. Vibrio cholerae</li><li>m. Yersinia</li></ol>
--	---
  
3. Had a previous illness, diagnosed by a health care provider, within the past three months due to Salmonella Typhi, without having received antibiotic therapy, as directed by health care provider. (Applies only to a conditional employee)
  
4. Has been exposed to, or is the suspected source of, a confirmed disease outbreak, because the food employee or conditional employee consumed or prepared food implicated in the outbreak, or consumed food at an event prepared by a person infected with any diseases bolded above. (Applies only to a conditional employee who will work with a highly susceptible population)
  
5. Has been exposed by attending or working in a setting where there is a confirmed disease outbreak, or living in the same household as, and had knowledge about, an individual who works or attends a setting where there is confirmed disease outbreak, or living in the same household as, and has knowledge about, an individual diagnosed with an illness caused by the diseases noted with a \* above. (Applies only to a conditional employee who will work with a highly susceptible population)

**Exclusions and Restrictions**

The PIC shall **restrict** the duties of a food employee from a food service operation or retail food establishment that has any of the **symptoms** listed on previous page.

The PIC shall **restrict or exclude** the duties of a food employee from a food service operation or retail food establishment that has any of the **illnesses** listed on the previous page (refer to Ohio Administrative Code 3701-3-13 for specific isolation requirements).

- Restrict- the employee may come to work, but duties may be limited so that there is no risk of transmitting a disease through food and the food employee does not work with exposed food; clean equipment, utensils, linens, and un-wrapped single-service or single use articles.
- Exclude- the employee may not come to work

**The PIC shall notify the licensor if an employee is diagnosed with any of the listed illnesses.**

**Returning to Work**

The PIC may remove a restriction or exclusion if the employee is released by a health care provider or by approval of the licensor. This provision does not prohibit a PIC from removing the restriction of a food employee if the restriction was due to symptoms listed on previous page, the symptoms have ceased, and the illness was not from an infectious disease agent listed on previous page.

**Policy**

Employee listed below is committed to ensuring the health, safety and wellbeing of our employees and customers by complying with all health department regulations and the purpose statement listed.

*Conditional employee: A potential food employee to whom a job offer is made, conditional on responses to subsequent medical questions or examinations designed to identify potential food employees who may be suffering from a disease that can be transmitted through food and done in compliance with Title 1 of the Americans with Disabilities Act of 1990.*

*Highly susceptible population: Persons who are more likely than other people in the general population to experience foodborne disease because they are a) immunocompromised, preschool age children, or older adults; and b) obtaining food at a facility that provides services such as custodial care, health care, or assisted living, such as a child or adult day care center, kidney dialysis center, hospital or nursing home, or nutritional or socialization services such as a senior center.*

## Clean-up Guidance for Vomit/Fecal Accidents in Food Service Operations

The 2016 Ohio Uniform Food Safety Code requires that all food service operations and retail food establishments have written procedures for employees to follow when responding to vomiting and diarrheal events. Information from this document can help develop written procedures for a facility.

**Note: Effective cleaning of vomitus and fecal matter in a food service operation or retail food establishment should be handled differently from routine cleaning procedures.**

It is recommended that written procedures for cleaning up vomiting and diarrheal accidents include the following steps:

1. Segregate the area. It is recommended that all surfaces within a twenty-five foot radius of the vomit or diarrhea accident be segregated and properly cleaned and disinfected.
2. Wear disposable gloves during cleaning. To help prevent the spread of disease, it is recommended that a disposable mask and/or cover gown (apron) be worn when cleaning liquid matter.
3. Wipe up the matter with towels and dispose into a plastic garbage bag.
4. Use a U.S. Environmental Protection Agency (EPA) registered disinfectant effective against *Norovirus* (Norwalk-like virus) following label directions or mix a chlorine bleach solution that is stronger than the chlorine solution used for general cleaning [CDC recommends 1000-5000 ppm or 2.5-12.5 fluid ounces of household bleach (5.25%) per gallon of water].
5. Apply the disinfectant or bleach solution and allow it to remain wet in the affected area for at least 10 minutes. Allow to air dry. Dispose of any remaining disinfection solution once the accident has been cleaned up.
6. Discard gloves, mask, and cover gown (or apron) in a plastic bag.
7. Take measures to dispose of and/or clean and disinfect the tools and equipment used to clean up vomit and fecal matter.
8. Properly wash hands.
9. Discard any food that may have been exposed.
10. *Food contact surfaces that have been disinfected must be **washed, rinsed, and sanitized prior to use** to remove disinfectant residue and prevent contamination of food.*
11. Discard all garbage bags in the dumpster or waste receptacle. If any of the waste appears to contain blood, refer to the Ohio EPA guidelines for disposal of infectious waste (<http://epa.ohio.gov/portals/34/document/guidance/SmG%20IW%20guidance.pdf>).
12. Minimize the risk of disease transmission through the prompt removal of ill employees, customers and others from areas of food preparation, service, and storage.
